

- **Beginner Python coding skills**

- **Machine learning experience**
not required

Code editor with Python support

- Free online: Google Colab
 - <https://colab.research.google.com>
- Or on your computer

Working with Google Colab

- Variable values can get stuck.
- If your changes don't seem to update, restart the runtime.

How to Debug

- **Search your bug, problem or question via a search engine**
 - Many answers on Stack Overflow
- **Join a Discord server**

How to Debug

- Visit the Github for the library that isn't working
- Visit the documentation for what you are struggling with

Disclaimer

- This course is not meant to be used as medical advice.
- The machine learning models should not be used to diagnose yourself or others without a medical professional.
